The diagram consists of a table with 7 columns and one row. A red diagonal line starts from the top center of the table and extends downwards to the right, crossing the right side of the table. The table is defined by a top horizontal line, a bottom horizontal line, and seven vertical lines that create the columns. The red line is solid and has a consistent thickness.

A large black triangular shape is overlaid on the right side of the table grid. The triangle's top vertex is at the intersection of the second row and the fifth column. Its bottom-left vertex is at the intersection of the fourth row and the seventh column. The right side of the triangle extends to the right edge of the page, tapering downwards.
